Professional Summary

Fresh Computer Science graduate with practical experience in software and web development projects. A quick learner who adapts easily to new technologies and enjoys exploring different areas of tech. Strong problem-solving skills with a focus on building efficient and user-friendly solutions. Eager to grow professionally, take on new challenges, and contribute effectively in a dynamic work environment.

Education

FAST National University of Computer and Emerging Sciences

06/2026

Bachelor of Science in Computer Science

Technical Skills

Web / Backend: React.js (TypeScript), Node.js, Express.js, **Concepts:** Programming Fundamentals, OOP, Design Patterns, Database, Data structures

Languages: Python, C++, C, C#, SQL, JavaScript, HTML/CSS

Tools: VS code, Figma, Canva, Git, Github, MS Excel, Word, PowerPoint, Oracle, Jenkins, Selenium, IntelliJ

Experience

Frontend Development Intern at TechnStack

09/2025 - 12/2025

Built responsive UI using React, HTML, CSS, and JavaScript and collaborated with the development team

Graphic Designer intern in GCD LCC(UAE)

06/2025 - 08/2025

Designed logos, digital ads, social media creatives, and marketing materials

UI/UX intern in Viral Vibes

07/2024 - 08/2024

Designed prototypes, website designs, portfolios and mockups

Projects

XcelTrack Web App | React typescript

Developed XcelTrack, a web-based Git-style tool for cell-level version control and collaborative management of Excel spreadsheets, improving tracking, managing versions, and audit logging in data analysis and implemented AI integration, real time collaboration with React.js frontend and Node.js backend using TypeScript/JavaScript.

LifeSaver | Python, TensorFlow, OpenCV

Developed an AI-based vehicle collision risk assessment system using computer vision, machine learning, and deep learning technologies (Python, OpenCV, scikit-learn, TensorFlow/Keras, PyTorch). Enhanced robustness through 8x data augmentation and real-time YOLOv8 detection, validated via ablation studies and Grad-CAM visualizations.

Inventory Management System Web App | SQL, C#

Developed a multi-role user management system with roles Admin, Manager, Customer, Stakeholder, and Cashier. The role-based access control, managing user authentication and permissions. All data was stored in an Oracle database and accessed via C# using the .NET Framework in Visual Studio.

Certifications

- Web Penetration Testing
- Frontend development
- UI/UX designing

Soft Skills

- Communication
- Problem Solving
- Team Work
- leadership
